

BOULDER VALLEY SCHOOL DISTRICT RE-2

NEW VISTA HIGH SCHOOL

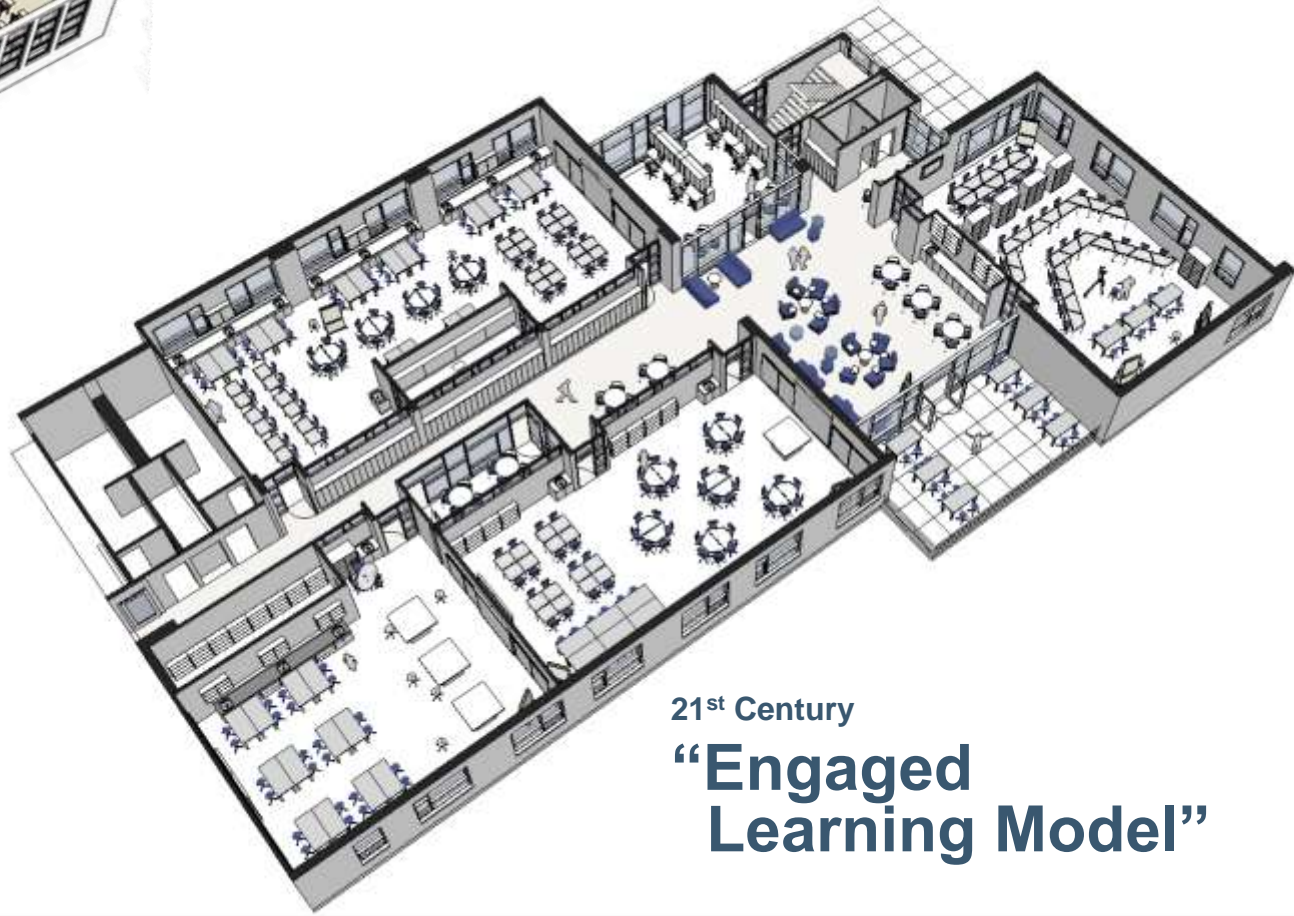

MOA ARCHITECTURE

20th Century

“Factory Model”

21st Century

“Engaged Learning Model”

Where We've Been

Accommodating Needs

- capacity / demographics
- support teaching
- safety / security
- code compliance
- healthy systems
- technology

Where We're Going

Inspiring Futures

- brain-based
- future aware
- connected
- adaptable
- experiential

Increase **motivation** through:

Choices

Provide choices for content, timing, work partners, projects, process, environment, or resources

Relevance

Personal, applicable, relate to family, neighborhood, city, health, etc.

Engagement

Emotional, energetic, physical; use learner-imposed schedules and peer support.

Increase **apathy** through:

Requirements

Fully directed activities, no student input, restricted resources, limited teamwork

Irrelevance

Impersonal, useless, out of context, testing/ standards-based

Passivity

Disconnected from the real world, low interaction, lecture, seatwork, isolation, etc.

source: Teaching with the Brain in Mind, by Eric Jensen

Research: Neuroscience & Education

- **ENJOYABLE ACTIVITIES**
dopamine enhances learning naturally and chemically, reduces the secretion of stress hormones
- **FUN + CHALLENGING**
effective approaches combine FUN with progressively increasing CHALLENGES
- **MOVEMENT IMPROVES LEARNING**
increases pre-frontal cortex activity which builds cognitive ability
- **THE WHOLE CHILD**
SOCIAL & EMOTIONAL development accelerate achievement
- **INTERNAL MOTIVATION**
is one of the most powerful tools for learning.

source: Sandra Aamodt & Sam Wang "Welcome to Your Child's Brain: How the Mind Grows From Conception to College"

- ❑ BELONGING
- ❑ COLLABORATION
- ❑ HEALTH
- ❑ INSPIRATION
- ❑ ADAPTABILITY
- ❑ DIVERSITY
- ❑ COMMUNITY
- ❑ STEWARDSHIP

Purpose, Caring, and Belonging

Connect to a common purpose to build strong, lasting relationships
The overall feel that the whole school building is immersed in the program
Relationships, community experience, small class sizes, advisor program
Showcase student work, visible student demonstrations of learning

Collaboration & Connectedness

Space that implicitly promotes community
Cross-curricular connections, collaboration and inclusiveness

Health, Wellbeing, and Fitness

Promote wellness through programs and activities
Inviting, comfortable environments with daylight, views, and good indoor air quality
Connections to outside activities and fresh air

Innovative Programs, Tools, Spaces, and Resources

Innovative programs that attract and inspire creative students / thinkers
Support teachers and staff with appropriate tools, space, time and resources
Offer specialty / magnet / non-traditional programs (such as bike tech and ski tech)

- ❑ BELONGING
- ❑ COLLABORATION
- ❑ HEALTH
- ❑ INSPIRATION
- ❑ ADAPTABILITY
- ❑ DIVERSITY
- ❑ COMMUNITY
- ❑ STEWARDSHIP

Adaptable and Flexible Environments

Adaptability to support multiple cross-disciplinary programs and activities
Spaces “right-sized” to accommodate various activities, groupings, furniture, etc.
Support concurrent activities/programs (including community events)
Design to accommodate innovation and change over time

Support Diverse Needs & Interests of all Occupants

Celebrate diversity and welcome differences.
Recognize and embrace unique learning styles, interests, and abilities.
Employ universal design principles for wayfinding, navigation, and flow of occupants
Safe, comfortable spaces for teenagers to hang out
Allow students to have choices, take breaks, host clubs, and study

Community Engagement

Create a conduit between BVSD, CU and the surrounding neighborhood
Spaces can function differently throughout the day and into the evening
Visibility from the community, source of pride

Environmental Stewardship

Net Zero Energy – as both teaching tool and energy conservation
Connections to nature

ADD

WHAT SHOULD WE BRING?

- all the different art spaces (dark room, computer labs, metal shop, ceramics space, studio spaces),
- mural spaces, natural materials
- Staff room, outside staff eating area,
- large sized science classroom with large lab closet, lots of sinks and counter space in room
- new furniture, AC units
- opportunities for flexibly sized groups to meet that include multiple grade levels;
- a large gathering space for all that could re-think the traditional auditorium seating;
- easy egress and ingress to outdoor spaces all over the building;
- multiple rooms that are not classrooms for small and large meetings;
- spaces that promote cross-curricular teaching and learning;
- classrooms where "there's not a bad seat in the house"
- sense of community, community experience, small class size, advisor program
- The Center space, the staff (planning) room, lots of green around us
- relationships- spaces for advisory to meet, small, medium, large spaces, art, video and music production, connections to CU, Chautauqua, and Boulder.
- The overall feel that the whole school building is immersed in the program (e.g. artwork displayed, etc.)

WHAT SHOULD WE LEAVE BEHIND?

- gendered bathrooms,
- florescent lighting,
- ugly old carpet,
- uncomfortable climate settings,
- lockers,
- narrow hallways
- All things related to the physical structure.
- AC, HEAT
- Almost everything, really, but especially that there are one-off, lonely classrooms way down halls;
- exposed pipes, poor use of negative space
- old building, bad heat, no A/C,
- Pretty much everything
- Hallways,
- one size fits all spaces,
- lack of light,
- silos - admin, counseling, teachers being separated from each other
- Inadequate ventilation and daylight

WHAT DO WE HOPE TO FIND WHEN WE ARRIVE?

- re imagined storage space (instead of lockers),
- natural light, big windows, flat iron views,
- a more modern design, an art gallery, more open classrooms and work spaces
- abundant natural light, maker space, cozy places to sit and talk.
- Bike parking. Beautiful outdoor spaces
- vending machines, soda machines,
- a way to shade windows that is effective at keeping out the sun and heat/cold as needed,
- a balcony area for students to work/study outside of my classroom or the counselors "center"
- places that are quiet,
- there are places where lots of interaction is happening;
- places to isolate are minimal yet monitor-able;
- it is easy for everyone to move through and around spaces
- hmm...good question. classroom connections to outdoors, flexible learning spaces
- More meeting/conference rooms for admin, staff, students.
- More parking, garden work area, bike racks, a beautiful auditorium, separate from a classroom for theater classes, well ventilated spaces for ALL, trees and more trees, outdoor classrooms.
- more stem opportunities, collaborative spaces with CU, state of the art video/music/digital art studios
- Highly insulated envelope, mechanical crawlspace (room on roof for PV), geo field, outdoor learning spaces, a focus on IEQ

EMERGING THEMES

- ❑ SPED is inclusion. what spaces are needed?
- ❑ Clarify Photography program, and connections to science/STEM.
- ❑ Health & fitness: clarify program needs.

Safe, Healthy, and Nurturing Environments

Allow all occupants to BE and FEEL safe, both inside and out.
Be accessible and welcoming while providing control and security.
Foster a culture of wellness including air, water, nutrition, daylighting, and environmental comfort.

Active Connection with the Community

Serve as a hub of activity and place of life-long learning.
Acknowledge and respect racial, social, and cultural diversity.
Include ample space for exhibition and display of student work.

Promote Collaboration & Strong Relationships

Provide physical connections between programs and activities.
Create multi-modal, project-based workspaces for teams and groups.
Connect to a common purpose to build strong, lasting relationships.

Innovative Physical Characteristics

Design to be physically and aesthetically pleasing, inspire learning.
Create spaces and features that are responsive and engaging.
Include elements that can be used as teaching tools for authentic learning.

Outdoor Connections

Connect learners with the environment around them.
Include a range of indoor-outdoor connections, views, and transitions.
Utilize outdoor spaces for exploring, learning, play, and environmental stewardship.

Effective Tools and Resources

Promote technical literacy through ubiquitous, robust, and updatable systems.
Equip all learning spaces with enhanced connectivity and devices.
Support teachers with appropriate tools, space, time and resources.

Adaptable and Flexible Environments

Adaptability to support future/unknown programs and activities.
Improve building performance and reduce operating costs.
Design to accommodate innovation and change over time.

Diverse Needs & Interests of all Occupants

Celebrate diversity and welcome differences.
Recognize and embrace unique learning styles, interests, and abilities.
Employ universal design principles for wayfinding, navigation, and flow of occupants.

- ❑ SPED is inclusion. what spaces are needed?
- ❑ Clarify Photography program, and connections to science/STEM.
- ❑ Health & fitness: clarify program needs.

- ❑ SPED had said they wanted to be inclusive with their program not a pull-out. Does this mean relocate the classroom and program, make it a regular teaching space and SPED can occur anywhere, or other?
- ❑ Does photography/digital lab want a connection with art, science, STEM or other program?
- ❑ Does the health program layout shown work for their program? Seems they said they really don't have a fitness program, maybe this helps build one?
- ❑ We need to add restrooms to the locker rooms in health.
- ❑ We show a café style food service area, is this appropriate? Would like to get away from the cafeteria style serving window please....!
- ❑ Confirm auditorium seating at 300.
- ❑ Confirm career center and counseling is okay separated on the second level from the rest of administration.
- ❑ Counseling had requested a yoga space in their suite, dig more into this.
